ON DEMAND ORTHODONTIST

How Healthy Smiles Begin

Orthodontics with an airway focused approach, delivered in your practice.

With ODO, our partner orthodontists integrate advanced aligner treatment with unique airway-focused protocols designed to promote healthy growth & long-term oral wellness. For many children under 10, nighttime wear may be recommended as part of a tailored treatment plan.

Consult and Financing

- Families meet with trained ODO Treatment Coordinators who guide them through airway-focused protocols and financing.
- Whether in or out of network, we handle approvals and payments so your team doesn't have to.

Chairside Made Simple

- Your role stays focused on high-value patient care: records, attachments, and relationships.
- Our Orthodontist partners design the plan while ODO books chair time directly in your practice management system.

Expert Oversight

- ODO orthodontists specialize in clear aligner design and kid-focused protocols, with teens and adults included.
- Remote monitoring keeps treatment on track with minimal disruption to your practice.

Keep Cases In-House

- Most referrals that would typically go out can now be managed in your office.
- You are compensated fairly for the work you do while keeping relationships and revenue in your practice.

What would keeping orthodontic cases in-house mean for your practice?

Revenue calculator				
	Phase 0 Palatal Expander	Phase 1 Invisalign First	Phase 0+1 Palatal Expander + Invisalign First	Phase 2/Adult Invisalign
Per-case:	~\$1,211	~\$1,525	~\$1,945	~\$1,880
Sample:	1 case	5 cases	1 case	3 cases
Subtotal:	\$1,211	\$7,625	\$1,945	\$5,640
Total Monthly Revenue: ~ \$16,421			Total Annual Revenue: ~ \$197,000	
				
Insurance handled	Financing managed		Referrals retained	Growth captured

WHAT ODO DOES

- Partners with skilled Orthodontists for case oversight.
- Manages the consultations, financing, monitoring, and system integrations.
- Pays for Invisalign and Dental Monitoring on every case, so the income shown is incremental to your practice with no direct costs.

Nominal monthly service fees apply to cover onboarding, integrations, and ongoing patient consultations.

*This model is illustrative and assumes 10 case starts per month. Actual results will vary based on case mix, patient acceptance, and practice participation.

How Does Dental Monitoring work?

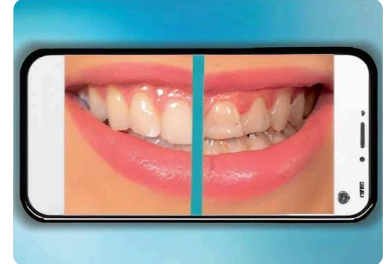

Dental Monitoring is an app that allows our team to monitor treatment between in-office appointments.

Take scans of patients smile from anywhere

Doctor receives feedback from patient scans

Patients can check how their smile is changing

Partner with ODO to deliver airway-focused orthodontics for kids, teens, and adults while keeping your practice growing

Ready to explore how this can fit into your practice?

Give us a call to start a discovery conversation. Together we'll review case volume and revenue opportunities, walk through workflow and integration steps, and map out how we can work together in a true pitch-and-catch partnership.
